What is Pharmacy ?

# Introduction Of Pharmacy

The Pharmacy Management System is a complete dispensing workflow management system that is designed to improve accuracy, enhance safety and efficiency. Most Pharmacies are still doing their whole work manually; this manual system requires the pharmacist or workers to manually monitor all the process and to check the presence of the each drug in Pharmacy.

# Working layout

Our project moto is

# How It works

- Pharmacy Management System is based on a concept of taking medicine orders with payments.
- In this system, there are no login features.
- The user can use the features of it which include taking new medicine order, deleting, modifying medicine orders, printing the receipt of payment and viewing the summary of total sales within a day.
- This mini project contains limited features, but the essential one
- Talking about the features of the Pharmacy Management System, the user can take a new medicine order.

- For this, the user has to provide the order number, name, date, number of medicine and select medicine.
- The user can delete the latest medicine order by providing the order number.
- In order to modify the order, he/she has to enter each and every detail.
- After taking orders, the payment is to be done from the receipt section.
- Here in the receipt section, the system asks for a receipt number.
- Then the system displays total receipt with medicine type, name, quantity, and total price.

# Result

```
D:\c++ project\pharmacynew.exe

*Pharmacy Management System*

1. Take new Medicine order
2. Delete Medicine order
3. Modify Order List
4. Print the Reciept
5. Daily Summary Report
6. Exit

Enter choice:
```

# Print the Reciept

```
D:\c++ project\pharmacy.exe
Enter the Reciept Number To Print The Reciept
2

=====
                Here is the Order list
=====
Reciept Number : 2
Customer Name: ram
Order Date : 15.aug.2020

=====
| Medicine Available |      Medicine Name      |      Quantity      |      Total Price |
=====++=====++=====++=====++=====
YES                Acicloir                1                2 INR

=====
Total Bill is : 2
Type the exact amount You need to pay: _
```

# Daily Summary Report

```
D:\c++ project\pharmacynew.exe
